Litigation Insurance Solutions

After the Event (ATE) Insurance: Designed to insulate claimants from having to pay opponents costs that they are legally liable to pay in the event they lose their action.

Security for Costs: A solution to 'upgrade' an ATE insurance policy to a non-avoidable instrument thus making it adequate to satisfy a requirement to provide security for costs.

Cross Undertakings: This can be particularly useful for clients who are largely illiquid or for liquidators with a limited fighting fund, who for good reason need to pursue a freezing injunction.

Capital Protection/WIP Insurance: Capital protection insurance insures some or all of the cash deployed (usually by a litigation funder) in bringing a legal action in the event the case is unsuccessful and they are unable to yield a return. WIP protection insurance insures some of the firms' accrued but unbilled fees if the case is unsuccessful.

Judgment Preservation/Appeal Protection: Suitable for claimants or defendants, judgment preservation allows you to 'lock in' a favourable judgment and protect yourselves against that decision being overturned on appeal.

Arbitration Proceedings Award Default Insurance: Covers the risk of a sovereign state being unwilling or unable to pay an arbitration award made against it.

Litigation Buyout/Contingent Risks: Contingent risk insurance is a broad title that essentially captures any risk that can be evaluated for legal uncertainty.

Residency Tax: Onshore tax authorities' may challenge the tax residency of an offshore company/SPV in situations where they consider that the tax residence rules have not been met or breached. Sophisticated tax insurance solutions exist to provide cover for such risks.
